Product @Vertex Inc. | WIPO PCT US Patent Holder | SRE, Platform, Agentic AI & SaaS Builder
Bengaluru, Karnataka, India

Summary

As a seasoned Full Stack Software Engineer with a decade of extensive experience, I have successfully navigated the dynamic landscapes of both multinational corporations and innovative startups. My expertise has been honed through the development of scalable SaaS applications across diverse sectors, including finance, insurance, life sciences, biotechnology, and the chemical industry. My ability to blend deep technical knowledge with industry-specific insights has consistently driven impactful solutions.

Recently, I further augmented my skill set by completing an Executive MBA in Product Management & Digital Innovation from the prestigious Indian Institute of Management Kozhikode. This advanced degree has equipped me with a strategic perspective and analytical acumen, enabling me to bridge the gap between technology and business.

I am now eager to leverage my comprehensive background in software engineering and my newly acquired business expertise to transition into a Product Management or Management Consulting role. My goal is to drive innovation, optimize processes, and deliver substantial value in these capacities by combining my robust technical foundation with strategic business insights.

Experience

Vertex Inc.
Senior Productivity Engineer - SDE III
October 2024 - Present (10 months)
India

McKinsey & Company
Forward Program Scholar
April 2025 - June 2025 (3 months)
